accurascale

New Announcement - 16 Ton Mineral Wagons In OO Gauge

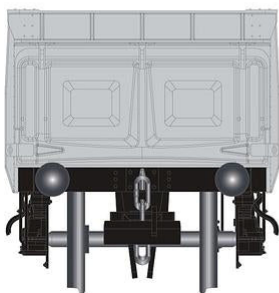

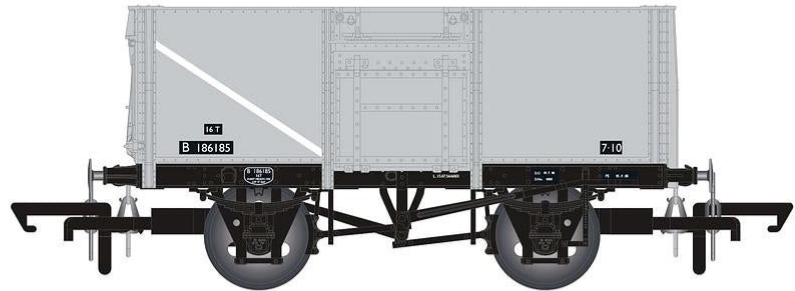

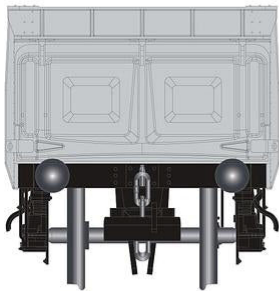

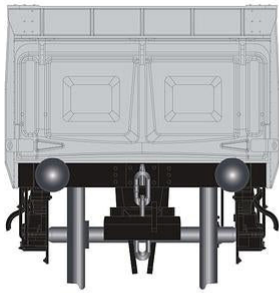

accurascale

It's time to reveal the latest addition to our now extensive range of "Powering Britain" coal wagon models; the ubiquitous BR 16 ton Mineral Wagons in OO/4mm!

Replicating British Railways in model form, we've embarked on a massive programme of tooling, producing versions of the BR 16T all-steel mineral wagon never before produced in ready-to-run format. This is of course along with a new generation of 16 ton

favourites which are a must for their 'Powering Britain' range of wagons which fuelled a nation.

18 Packs (With More To Follow)

The most common wagon in the land needs a lot of packs to get rake building. We have 18 in our first launch, from original and TOPS era liveries to post BR ownership industrial liveries, so there is something for everyone!

[Browse The 16 Ton Range Here](#)

16 Tonner History

A stalwart of the British Railways network following nationalisation all the way into industrial use into the 80s, The 16 tonner became the most numerous wagon on the network.

Learn all about their history and detail differences in our launch blog.

[16 Ton Mineral Wagon History](#)

Why Are Accurascale Making It?

accurascale

It's quite simple really, variation! Many variants of these wagons have not been produced in ready-to-run format before, so we have decided to take on these differences, as well as some of the old favourites to bring you the most comprehensive 16 ton mineral wagon model to date. It is also an absolute "must" for our "Powering Britain" range of coal wagons.

With all the major British Railways' 16T types designed and tooled, this first run follows the story of the unfitted Morton braked wagons, with 1/108, 1/109 and MCO rebodied versions being released in a variety of liveries and running gear combinations.

Models produced in this run exhibit the following variations:

- Three types of end door
- Three types of buffer housings
- Welded and rivetted original bodies.
- Welded rebodies.
- BR standard and square axle journals.
- Standard and pressed steel handbrake handles.
- Morton unfitted and double unfitted independent brakes.

Check out our launch video where Project Manager Paul Isles discusses the differences in more depth by clicking on the image below!

accurascale

Brand new 'OO' gauge announcement

Prices And Availability

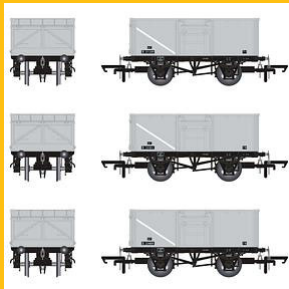

accurascale

Tooling is now complete with the first samples arriving for assessment earlier this summer. While the models are shaping up nicely feedback on fit and finish of some parts as well areas such as the wheels, which are currently missing their characteristic

holes, will also be addressed. Some parts are also missing from the samples.

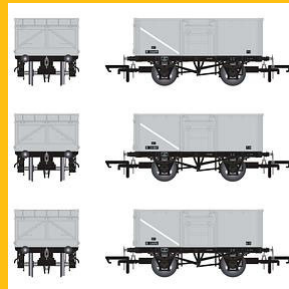

Our 16t family will be sold in triple packs at a cost of £74.95 per pack, with delivery anticipated for Q3 2024. With a mammoth 20 different packs to make up the first run between general releases in BR livery, a selection of private owner sets reflecting later use in industrial railway settings (a great passion of ours!) and Accurascale Exclusive packs (announced later this year) it gives the modeller great potential to build large prototypical rakes along with a few wagons to add to a classic mixed freight operation.

Pre-order direct for no money down until they arrive in stock, or using our flexible payment options to spread payment over 6 months at no extra cost, below!

Oggetto: Mark 2b Update September 2023

accurascale

Mark 2b Update September 2023

Great news! Our first batch for of our mammoth Mark 2 project, covering Mark 2b and Mark 2c coaches, is complete, with the Northern Irish versions now on the high seas for our sister brand, IRM. And most splendid they look too. Being a much smaller production run, they were completed ahead of their Accurascale counterparts.

**IRISH
RAILWAY
MODELS**

However, what does this mean for our BR variants for Accurascale? Well, they are hot on the heels of their IRM sisters, with final stages of production now under way and due to be complete at the end of September. We had hoped to have them completed now, but the sheer demand and size of the production run for these coaches has been unprecedented and the factory has been working tirelessly to finish them to the highest standards that we demand for our models.

We are due final production samples in a couple of weeks, which we will show here. Delivery to modellers will be around the Warley show in November. After that, it will be straight into Mark 2c production for both IRM and Accurascale.

We are completely sold out of Accurascale Mark 2b coaches, but still have some Mark 2c coaches available. Grab them below while you still can, as they are very close to selling out too.

Class 37 Speaker Clips Now In Stock

Excellent news! Our speaker clips for our Class 37s are now in stock. These clips hold our large 'accurathrash' speaker in place in the locomotive, meaning you can now upgrade your loco to full fat factory fitted sound should you so wish!

We will also have these for our Class 55 Deltic locos coming very soon, so keep an eye out for that.

Order below and upgrade your Class 37 today.

Like our Class 37s? Grab The Last of Our Class 92s

Our new Class 37/6 locomotives along with Network Rail 97301 are still being shipped out and are now landing with modellers around the world.

A perfect loco for the mid-90s to the current era, we also offer another rather tasty locomotive from that era. The Class 92.

With operating raising and lowering pans on DCC control (can also be clipped and unclipped and raised on DC by hand) a large Accurathrash speaker in all locos, powerpack stay alive capacitor, a wealth of detail and multiple lighting configurations, you will have to

a long way to find a loco of this specification for such an unbeatable price.

We are running out of stock on these locos, so make sure you grab them while you can.

Oggetto: Voting For the 2023 Hornby Magazine Awards Is Now Open

accurascale

Voting For the 2023 Hornby Magazine Awards Is Now Open!

2023 VOTING OPEN NOW

It's that time of year again as the 2023 Hornby Magazine Awards voting gets under way!

It's a hugely competitive field this year, and we have had our biggest year to date when it comes to entries, with no fewer than three locomotives featuring our Class 92, Class 37 and our 78xx Manors!

Wagons feature our newly released and highly popular FNA-D nuclear flask wagons, along with our MHA spoil wagons, our cute Chaldron black waggons and our low level nuclear waste PFAs!

We also make our debut in the OO Gauge Coaching stock category, with no fewer than three entries for our Mark 5 Caledonian Sleepers, our TPE Mark 5 sets and of course our Siphon G bogie vans.

It has been our busiest year ever for delivery and there are of course more goodies to come. If you could find it in your heart to give us your vote in these categories, and the "Manufacturer of the Year" section, we would be honoured and delighted.

Click on the button below to cast your vote!

Enjoying Your Class 37/6? Check Out Some Of Our Wagons To Go Behind It

Our Class 37/6 locomotives are currently landing with retailers, modellers and collectors across the land as we distribute the absolutely massive demand for these quirky takes on the legendary and long-lived EE Type 3s.

Rebuilt in the 1990s and put to work by DRS for many years after the fledgling business took shape, they were almost synonymous with nuclear related traffic throughout their careers in the famous blue livery.

Thankfully, we have some excellent nuclear wagon options available, with limited stock remaining! From nuclear flasks, to low level nuclear waste, we have you covered. Remember, there is 10% off each wagon pack when you buy two or more packs, with free shipping and loyalty points to be earned with each purchase. After all, we are the best bang for you buck!

Edging Closer to our £10,000 Goal For Prostate Cancer UK

Last month we announced our partnership with Prostate Cancer UK with the aim to raise £10,000 for this most worthy cause through an exclusive model of 66769.

You, the model railway buying public, have responded magnificently, with sales flying in, edging us closer to our target donation of £10,000.

The great news is, that we are almost there, but just need one big last push to achieve this goal.

So, if you haven't pre-ordered yours yet for delivery in Q1 2024, but would like this stunning looking Class 66 and support this amazing cause, you can do so below, for no money down until delivery!

Oggetto: O Gauge Sale - Earn Triple Points Ahead Of Our First O Gauge Loco Launch

accurascale

O Gauge Sale - Earn Triple Points Ahead Of Our First O Gauge Loco Launch!

O gauge fans; as you may know, we will be **announcing our first O Gauge locomotive** at the forthcoming "Great Electric Train Show" at Milton Keynes next month.

However, if you cannot wait that long and fancy a slice of Accurascale O gauge, why not check out our HOP 24 wagons, currently on sale? Perfectly at home behind steam or diesel from

the 1950s to the mid 1980s, in mixed or block formation, they were a stalwart of coal traffic.

We have 7 available, currently **with 17% off!** On top of that, you **get a further 10% off when you buy two or more wagons, and get FREE UK postage and packaging!**

That's a lot of savings, right? But how about some more? **Okay, for this weekend only, you also get TRIPLE loyalty points which you can use against a future purchase, with 10% cash back on any in stock order placed between now and Monday, September 18th at 5pm! Perfect to use against our first loco to help you save more when pre-orders open next month.**

After all, as you will find out as we grow in O gauge, we offer realistic models at realistic prices, and the **best bang for your buck.**

Oggetto: Class 37 Run Two Decorated Samples Are Here - Full Update

accurascale

Class 37 Run Two Decorated Samples Are Here - Full Update

accurascale

With our highly anticipated Class 37/6 locomotives now arriving on layouts across the land (and beyond!) and the last part of our first production run, the original 5 pilot scheme locos on the high seas and due in stock next month, we have our second production run of Class 37s progressing well.

In fact they are now in production!

accurascale

We recently received these decorated samples from our factory and have assessed them ahead of signing off production. We have a total of 9 diverse machines catering for multiple eras, from the 1960s to the present day making up this run, along with the limited edition model for the Heavy Tractor Group of 37714.

Before we look at the models, we have identified and made the following changes to these pre-production models before we signed off for production;

- Buffer shanks will not be silver, they will be black-brown
- Some samples have the wrong etched kickplates, these will be corrected for production
- The marker lights on 37140/37258 will gain their missing their black surrounds and the fit of the lens will be improved
- 37218 has a subtly wrong bodysell with the former boiler access panel still in situ and we have already approved the replacement correct bodysell
- 37422 has an rogue red fuel gauge blanking plate. This will be corrected for production
- And now to the photos of each!

Delivery for these locomotives is slated for Q2, 2024 due to their popularity and the finishing of run 1 locomotives taking longer than anticipated. Unfortunately, we are now pretty much sold out an almost all running numbers on pre-order direct, but check out your local retailer, or our website for what is left, along with a small supply of our new Class 37/6s which are currently in stock. Be quick, they're moving fast! Click below.

Oggetto: Need Some Wagons For Your DRS Class 37? Check Out Our Nuclear Range

accurascale

Enjoying your DRS liveried Class 37s such as our Class 37/6 locomotives which have begun to show up on layouts across the land?

Well, why not put some high quality, beautifully crafted and accurate wagons behind them? Our range of nuclear wagons are now legendary, including a variety of low level nuclear waste wagons on our adorable PFA flat wagons, and the latest generation nuclear flask wagons, the FNA-D, currently in stock, some in extremely limited numbers.

Grab yours below, with 10% off when you buy two or more packs and free UK postage and packaging!

Last of the Class 37/6s and Manors In Stock

Our Manor and Class 37/6 locomotives have recently arrived in stock to great acclaim among modellers. As a result, they have been red hot sellers, with just a few left in stock. We advise that you move now should you wish to add these locomotives to your fleet.

All models are DC/DCC ready, but you can upgrade them with our sound decoders and speaker kits. We're also almost sold out completely of some Class 92 running numbers. Again, once they're gone, they're gone!

Order below.

Oggetto: God's Wonderful Railway And Accurascale - A Match Made In Heaven

accurascale

God's Wonderful Railway And Accurascale - A Match Made In Heaven

We like a theme here at Accurascale. Instead of just making a random item of rolling stock, we want to build a range of locomotives which have matching stock to pull.

We have achieved this in a small way with our first steam locomotive, the gorgeous 78xx Manor locomotives, and our equally splendid Siphon G vans.

The rest of our Manors arrive at our warehouse next week, but we still have a very small amount of Cookham Manor and Anthony Manor in GWR livery left in stock. You can also pair them up with some GWR liveried siphons, or, if BR is more your era, pick up some carmine or maroon vans for the impending arrival of your BR Manor.
