Bachmann's New E-Z Command® Plus

**More Control and More Possibilities for Your
DCC Model Railroad**

Bachmann Trains is pleased to announce the next generation of the *E-Z Command®* DCC control system, *E-Z Command® Plus*. With *E-Z Command® Plus*, digital control of speed, lighting, sound, and direction of multiple locomotives is at your fingertips, as well as remote control of Bachmann *E-Z Command®* DCC-equipped turnouts. *E-Z Command® Plus* simplifies the

programming process for locomotives with one-button, on-track programming and now features the ability to control up to 29 decoder functions per locomotive. Additional features of the *E-Z Command® Plus* system include 128-speed steps for smooth operation and plug-in wiring for simple setup, single-locomotive emergency stop in addition to full-track emergency stop, an LED lighted speed indicator, and new LED push-button controls. *E-Z Command®* will operate all DCC-equipped Bachmann locomotives as well as NMRA-compliant DCC locomotives from other manufacturers.

Item No. 44933

Included Features

- digital control of multiple locomotives in N, HO, and On30 Scale
- digitally control speed, direction, lighting, and sound
- simple on-track programming
- 128 speed-step locomotive control for addresses 1-8

- LED speed indicator display
- both individual locomotive and full-track emergency stop buttons
- up to 29 possible control functions
- Bachmann *E-Z Command*® DCC-equipped turnout control
- wall pack power supply
- plug-in wiring for setup in minutes

36' Wide-Vision Caboose **New Road Names Now Available in N Scale**

The Wide-Vision Caboose (also known as Extended-Vision Caboose) was designed with a wider cupola projecting from its sides. In the 1950s, taller "excess height" railcars were

developed to allow for more and larger loads to be carried per car. The extended cupola assisted the train's crew in seeing beyond these larger cars, while also giving them better visibility around the sides of the train. This caboose design saw service on most U.S. and Canadian Railroads and many lasted in service into the 1980s and beyond. Bachmann's Wide-Vision Caboose arrives fully assembled and come in a variety of paint schemes reflecting both classic and modern railroads across North America.

Baldwin 4-6-0 Locomotives **New Paint Schemes Now Shipping**

Building on the popular 4-4-0 design, the 4-6-0 (often called the Ten-Wheeler) provided extra tractive effort to haul heavy loads through mountainous terrain. This made it perfectly suited for both freight and passenger service on the quickly expanding North American rail system. By the mid-19th century, the 4-6-0 wheel arrangement was the second most popular configuration in the United States, finding a home on almost every railroad in operation at the time. Bachmann faithfully reproduces this early Baldwin-designed Ten-Wheeler in HO Scale, arriving DCC-ready, and featuring an 8-pin socket for the DCC decoder of your choice. Additionally, two new paint schemes are also shipping.

Bachmann is Headed to the National Train Show

We're headed to Texas. Look for the Bachmann booth at the NMRA National Train Show this weekend in Grapevine, Texas. We'll have samples of some of our latest arrivals, new, never-before-seen pre-production models, and of course, we'll be unveiling our annual mid-year product announcements at the

show. The NMRA National Train Show takes place from August 25th to 27th.
Click the link below for more information. See you there!

Bachmann's Animated Stock Cars

Bring Your Railroad to Life in Large Scale or HO

Enjoy the action as four animal heads peek back and forth through windows as the Bachmann Animated Stock Car moves across your layout! Stock Cars, sometimes referred to as cattle cars, are a type of rolling stock used to transport livestock. They were a common sight from the late 1800s right up until the mid-1950s when most were replaced by trucks. The Bachmann Large Scale Animated Stock Car rekindles the heyday of these cars with a selection of attractive paint schemes and animated animal cargo, including painted cattle, horses, and reindeer! Bachmann Large Scale rolling stock is designed for indoor or outdoor use on all G Scale model railroads.
