Transport Your Livestock in Style

with Bachmann Stock Cars

Stock Cars, also referred to as Cattle Cars, are a type of rolling stock used to transport livestock and larger animals between farms and other destinations. They were a common sight on railroads across North America from the late 1800s until the mid-1950s when trucking became more economical. The Bachmann 40' Stock Car rekindles the heyday of these fascinating railcars with a selection of attractive and authentic paint schemes, see-through slatted siding, opening doors, separate brake wheel, and *E-Z Mate*® Mark II couplers.

New Road Names & Paint Schemes in HO Scale

NMRA National Train Show Report

Thanks to everyone who stopped by our booth during the NMRA National Train Show. We always enjoy meeting modelers and having some "train talk!" Despite the Texas heat, it was an excellent show, and we look forward to bringing you the new announcements unveiled at the show over the coming months. Want to see where we're headed next? Follow us on social media for the latest information on our show dates and more.

[Download our 2023 Mid-Year Announcement Brochure](#)

Thanks to the Gulf Western Modular Railroad Society for hosting our HO Scale Amtrak® Pacific Surfliner® SC-44 Charger and our upcoming Santa Fe "SPSF Scheme" SD40-2 on their layout for photos - they looked right at home!

THE CIRCUS IS COMING TO TOWN!

Now Arriving: *Ringling Bros. and Barnum & Bailey™*
Passenger Cars with Lighted Interiors

RINGLING BROS. AND BARNUM & BAILEY™

For more than 100 years, *Ringling Bros. and Barnum & Bailey™* traveled the country by rail. Animals, props, equipment, staff, and performers would all be based aboard the train for each tour, and as such, all the comforts of home were needed, including an onboard restaurant. The "Pie Car" as it was traditionally known, would serve up to 1500 meals each week and offered a gathering space for circus members to relax and catch up with each other. The HO Scale Pie Car can now be added to your *Ringling Bros. and Barnum & Bailey™* circus train, arriving with interior lighting, blackened metal wheels, and authentic decoration. Red and Blue Unit versions are available.

NEW AND NOW IN STOCK

Trackside in the Lone Star State...

The Dallas/Fort Worth area provides some excellent variety for the railfan, as we discovered while in the region for the NMRA National Train Show. Here's a selection of what we were able to see in between showtime.

Commuter trains at Dallas Union Station - there's no doubt this is Texas!

Historic trolleys (including this Birney) in daily service on the M-Line streetcar line.

The Dallas skyline behind a Dallas, Garland, and Northeastern freight.

The Berkshires Are Back
HO Scale 2-8-4 Berkshire Steam Locomotives
with DCC Sound Value® On Board

Developed as an improvement of the 2-8-2 Mikado design, the 2-8-4 Berkshire gained its iconic moniker while being tested on the tough grades of the Boston & Albany Railroad in the Berkshire Hills. From the mid-1920s to the early 1950s, Berkshires could be found throughout the East Coast and Upper Midwest, and following the steam era's demise, a handful of 2-8-4s returned to steam in mainline excursion service. These included C&O® #2716, Pere Marquette #1225, and Nickel Plate Road #759 and #765. Together with other notable steam survivors, these Berkshires were instrumental in keeping the romance of big steam alive in the American consciousness, and both Pere Marquette #1225 and Nickel Plate Road #765 continue to wow crowds in mainline excursion service to this day. The Bachmann Berkshire arrives DCC sound-equipped with Soundtraxx® Econami™ DCC Sound Value® on board. Sounds include an authentic prototypical chuff, short and long whistles, bell, air pump, steam release, and blower effect. Each model features a precision motor, die-cast chassis, brass-machined flywheel, metal handrails, LED headlight and tender backup light, die-cast marker lights, metal wheels, *E-Z Mate*® Mark II couplers, and road-specific details and tender configurations.

*Nickel Plate Road #765 at Carland (between Elsie and Owosso, Michigan.)

Baldwin 2-8-0 Consolidation **DCC *Econami*™ Sound Value Equipped**

Constructed between the 1900s and 1940s, the Baldwin 2-8-0 proved to be one of the most popular locomotives in the manufacturer's catalog. Typically found in freight service, the 2-8-0 was a versatile locomotive that could just as easily handle a passenger train, and several have survived into preservation where they continue to perform this role. Bachmann's HO Scale Baldwin 2-8-0 replicates the iconic design with intricate detail. With features such as separately applied piping and grab irons, operating metal drivers, and Rule 17 lighting, the model arrives with Econami™ Sound Value® DCC. Factory-set for realism, the Econami™ steam package offers a choice of 16 whistles, 6 bell types, 4 prototypical chuffs, 5 air pumps, and 4 dynamos plus cylinder cocks, grade crossing

signal, blowdown, brake squeal/release, coupling/uncoupling, water stop, and "All aboard"/coach doors—all in 16-bit polyphonic sound. Give your HO Scale freight consists the power they need with the Bachmann Baldwin 2-8-0 with Econami™ Sound Value®!

Western Maryland® #734 is one of the most well-known Baldwin 2-8-0s in preservation.
