**50'6" Boxcar with Flashing LED
End of Train Device**

[Shop Now](#)

HO SCALE

In the late 1980s, the classic railroad cabooses were largely displaced by the implementation of flashing "End of Train" or "EOT" devices, also known as "FREDs" or "ETDs." On prototype trains, the device autonomously monitors brake line pressure and is capable of sending train data to the locomotive, while also providing a blinking warning light to alert any following trains to the presence of the train in front. Our 50'6" Boxcar with operating flashing "End of Train" device allows you to replicate this essential modern component on your HO scale freight consists. Featuring a track-powered flashing red LED, the device can also be purchased on a standalone truck, allowing you to add this fun and authentic feature to compatible freight cars in your existing collection.

USRA 2-8-2 Light Mikado

DCC Ready with NMRA 8-Pin Plug

[Shop Now](#)

HO SCALE

The 2-8-2 Mikado was one of the most prevalent steam locomotives in North America during the first half of the 20th century. Approximately 2,200 were constructed by the three major locomotive manufacturers, each of which based their design closely on a configuration developed by the United States Railroad Administration (USRA) during the nationalization of railroads in World War 1. Despite being outpowered by subsequent locomotive models, they remained in front-line service right up until the end of steam in the late 1950s. The highly detailed Bachmann USRA Light Mikado includes intricate prototypical features and is DCC ready with an NMRA 21-pin plug.

New and Now In Stock

UNION PACIFIC® #2481 with MEDIUM TENDER
Item No. 54406

NICKEL PLATE ROAD #587 with LONG TENDER
Item No. 54407

4-4-0 American Steam Locomotive

Available Now with DCC Sound Value® On Board or DCC Ready

[Shop Now](#)

HO SCALE

From moving troops and supplies in a divided nation to uniting the country in steel at Promontory, it's little wonder that the 4-4-0 is known simply as the "American." Larger than its predecessors and powerful enough to transform the railroad into an essential transcontinental system, the 4-4-0 was further immortalized in later years as a star in countless Western movies. To this day, its classic appearance and opulent decoration evoke the adventurous spirit of the Old West and the pioneering determination of a nation in its youth. Select Bachmann 4-4-0 Americans now arrive with Soundtraxx® Econami™ DCC for an immersive steam locomotive experience. Effects include a prototypical chuff, factory-programmed single chime whistle, bell, air pump, steam release, blower, and much more - all in 16-bit polyphonic sound. Your American adventure is calling with the Bachmann sound-equipped HO Scale 4-4-0.

New York Central 4-6-4 J-3a Hudson

Sound Equipped in HO and N Scale

[Shop Now](#)

N SCALE

As the demand for rail travel increased in the 1920s, there was an apparent need for faster, more powerful locomotives to pull the *20th Century Limited* and other express services along the New York Central Water Level Route. The solution was delivered by the American Locomotive Company in 1927, as the 4-6-4 Hudson entered service hauling priority trains alongside its namesake river. The type quickly became a symbol of speed and reliability for the New York Central, lasting in service to the end of steam in the 1950s.

Factory-set for 4-6-4 maximum realism, our N scale Hudson is equipped with an Econami™ SoundTraxx® steam package. The locomotive offers a choice of 16 whistles, multiple variations of 6 bell types, 4 prototypical chuffs, 5 air pumps and 4 dynamos, plus cylinder cocks, grade-crossing signal, blowdown, brake squeal/release, coupling/uncoupling, water stop, and "All aboard"/coach doors—all in 16-bit polyphonic sound. Visit your favorite hobby retailer to add this engine to your N scale layout today!

Turning the clock to the modern era is our new HO Scale Short Body Bay Window Transfer Caboose! Based on a Missouri Pacific™ design that was adopted by several other railroads, this late-era cabin is the perfect addition to any freight railroad set between the late 1970s and 2000s. The model features new and existing tooling, road-specific details, and plenty of separately applied components!

Watch our video on the Short Body Bay Window Transfer Caboose here:

Spring is here!

Bachmann has Large Scale Streetcars, Eggliners, and more!

[Shop Now](#)

LARGE SCALE

Upgrade your indoor layout with Bachmann's new Auto Reversing Point to Point System

The Bachmann Large Scale Optical Auto-Reversing System brings automatic point-to-point train or streetcar operation to your railroad. Set up your system, add your train, and watch as it operates back and forth at your specified speed and stopping intervals between two destinations up to 20' apart. Indoor use only.

OPTICAL AUTO REVERSING SYSTEM

Item #96222

Features Include:

- Large scale auto-reversing speed controller and wall power pack
- Power connector with track clip
- Two optical sensors with track clips
- 3' red power wire
- 20' green sensor wire
- Black double-ended sensor-to-controller wire
- Streetcar sold separately

New and Now In Stock

Complete Your Point to Point Layout With A New Streetcar

The Bachmann Closed Streetcar is now equipped with metal gears for smooth and long-lasting operation. Based on cars typically found in North American cities from the late 1800s to the 1920s (and in some cases later), the Closed Streetcar features an operating headlight on each end, a fully furnished and lighted interior with seats and hanging straps for standing passengers, poseable doors, and a non-functional positionable metal trolley pole. Transport your Large Scale citizens around town or across your holiday scene in style with the Bachmann Closed Streetcar.
