Track Cleaning 40' Gondola Cars

New and Now Shipping in HO Scale

[Shop Now](#)

HO SCALE

With low sidewalls and sturdy, solid construction, gondolas are designed to handle many varieties of freight, from steel plates and coils to ballast, scrap metal, and even oversized items such as track segments. Based on a popular steel design that first appeared in the late 1920s, the Bachmann 40' Gondola arrives in a vibrant selection of authentic railroad color schemes representing a range of eras. Now shipping, Bachmann's track-cleaning variation of this popular Gondola provides an efficient and economical way to clear your track of performance-affecting debris and residue. Featuring an exclusive dry cleaning system with a reusable pad attached to the underside of the chassis, the Bachmann Track-Cleaning Gondola will help ensure consistent smooth operation on your HO Scale model railroad.

DEALER NEWS

Canadian 4-Bay Cylindrical Grain Hoppers

Shop Now

HO SCALE

First developed in the late 1960s, the Cylindrical Hopper was both unique in appearance and enjoyed better structural integrity than the available alternatives of the time. While the type saw some success in the United States, it was the Canadian interests that led to its widespread use. Facing aging rolling stock with limited capacity, Canadian wheat farmers were experiencing supply-chain issues in getting their goods to market. To help rectify this, the Canadian Government purchased 13,000 cars between 1970 and 1990 for shared use between Canadian National and Canadian Pacific. While more were purchased by individual railroads, it was these government-sponsored cars that turned heads, thanks to their vibrant red, orange, and blue paint schemes, proudly advertising Canadian wheat and the provinces in which it was grown. Today, many of these cars remain in service, and thanks to the sheer number produced, they can be spotted in both unit trains and on mixed freights across North America. With Bachmann's N Scale Canadian Cylindrical Hoppers, you can bring the vibrant colors of the iconic grain train to your railroad with realistic paint schemes, metal wheels, and body-mounted *E-Z Mate*® Mark II couplers.

Single Dome Tank Cars

Shop Now

HO SCALE

Designed to haul a wide variety of liquid loads, tank cars have been a crucial element of freight railroading since the pioneer era, hauling water, oil, and other commodities that were invaluable for shaping the nation. The tank cars featured in this release represent some of the last single-dome examples built with a riveted tank design, which were delivered between the late 1920s and early 1940s. Found across North America, our model represents cars in their heyday, when they served a wide selection of private owners with eclectic names and colorful paint schemes. The Bachmann Single-Dome Tank Car features a prototypical, detailed body, blackened metal wheels, body-mounted *E-Z Mate*® couplers, separately applied ladders, and metal wrap-around grab irons.
