Speedi Loco Driver Cleaner

Quickly and simply removes dirt and gum from locomotive drive wheels. Restores electrical pickup, eliminates erratic locomotive performance due to dirty, scummed wheel treads! Just clip brush leads any place on running rails. Locomotive motor thus powered, spins drivers against brush to whisk away grime and corrosion from driver treads in seconds. Works with DCC. A real hobby helper!

NO SPECIAL WIRING REQUIRED!

March Tech Tip

#1 To keep your locomotives operating to their peak performance, regular maintenance is required. Just like your automobile you have to check the tires. The Kadee® Speedi Loco Driver Cleaner, cleans your locos drive pickup wheels spinning away dirt and debris so the wheels make good contact. The wheels picking up the current from the tack is essential for your loco to runs as smooth as it can.

#2 Never use grease or any other liquid lubricant other than powdered graphite on couplers and trucks. Dry powdered graphite is the only lubricant Kadee® recommends. Liquid lubricants can react to the materials used in couplers, gearboxes and wheelsets and trucks are made from shortening the life expectancy. Liquid lubricants also attract dirt and debris, drying out over time making for a sticky messy cleanup. Lubricants are supposed to make parts move freely without a sluggish response.
