

Dear siku Fan,

We are at Agritechnica 2023! With 24 exhibition halls and over 2,600 exhibitors, Agritechnica is the world's largest agricultural machinery exhibition. Here you will meet the mighty role models of the siku toy models from 12th-18th of November.

But enthusiasm is not a question of size: This is proven by the siku booth in hall 21 booth D26, which is waiting for you with many exciting activities around the toy models!

This year's blackline special model from siku is a classic set consisting of the Eicher Königstiger and the two-axle trailer. In addition to the otherwise modern 1:32 range, the classic blackline set adds a special historical component. Like earlier blackline models, the historic combination of tractor and trailer is kept in elegant black and silver. This special model is further enhanced by matching accessories. Two foldable, black and silver beer tent sets travel on the two-axle trailer. The silver table and bench surfaces offer an elegant eye-catcher on the black pendant. The set is limited to 1000 pieces. The retail price at the fair is 40 €.

We look forward to seeing you!

We once again support the Pink Ribbon campaign

The pink ribbon is a symbol of campaigns and activities against breast cancer worldwide. In addition to prominent women such as Frauke Ludwig, Regina Halmich and marathon runners Anna and Lisa Hahner, companies are also involved in the campaign. For the first time ever, Siku will present a pink remote-controlled tractor at Agritechnica. The Claas Xerion can be controlled and controlled by a remote control as well as the Siku Control app. At the wheel of the tractor sits a woman in a pink overall. The Pink Ribbon Edition is limited to 250 pieces. The retail price at the fair is 240 €.

LUPER

Der erste Bagger der Welt
Durch den Anbau eines Prototyps eines Baggers mit Hydraulikzylindern an die Rückseite eines Frontladers erfindet Joseph Cyril Bamford den ersten Bagger der Welt, den MX 1 Bagger.

The world's first backhoe loader
By attaching a prototype of an excavator with hydraulic cylinders to the rear of a front loader, Joseph Cyril Bamford has invented the world's first backhoe loader, the MX 1 excavator.
