## ON THE COVER

### *The Right Track to Realism!*

"Back two..." crackles over the radio. The prime mover idles up, brakes release and the local eases back into the siding to set out cars. Today's highly detailed models deserve track that's just as realistic, and modeling it is easy with the tremendous selection of items available from Walther's and our many suppliers. Whether you're looking to expand a train set or build a basement empire, you'll find a huge selection of basics like curves and straight sections, flex track, layout-ready turnouts, specialty items like bridge track and crossings, plus a full range of accessories to turn your bare benchwork into a working railroad. Start planning and save during our annual Track Sale, on now! Turn to page 10 to get started.

# READY FOR THE RUSH

From the Great Plains to the Great Lakes, rails are already humming in anticipation of the fall grain rush. Talk around the elevators is that this year will be a bumper crop, and local railroad agents are getting calls every hour for additional hoppers as line-side elevators gear up. No matter the season, modeling heavy traffic on your railroad is easy with Walthers! You'll find a great selection of colorful covered hoppers, including these newest additions to our fleet of 59' Cylindrical Hoppers. Getting those cars to and from the country is a big job that'll keep locals - and extra trains - running day and night, and WalthersProto® has the motive power you need to keep your road running. With Cornerstone® structure kits, and SceneMaster™ supplies, you'll find everything you need to make your HO layout grow!

## **WALTHERS**CONTROLS™

Walthers Layout Control System Switch Machines provide an easy and affordable plug-and-play solution that lets you take control of every turnout from passing sidings to yards. You can enjoy push-button control, direct access from your DCC throttle, remote operation by a dispatcher, or a combination of all three, on layouts old or new from Z to O. So what are you waiting for? Go remote control in minutes with the Walthers Layout Control System. Check out all the available components at [walthers.com/waltthers-controls](http://walthers.com/waltthers-controls).

## **WALTHERSTRACK™**

### THE RIGHT START FOR A REALISTIC RAILROAD

Track is the solid foundation of every great model railroad! Walther's track products have been modeler's first choice for HO layouts big or small for over 30 years!

Completely retooled for more reliable performance and a more realistic appearance Walther'sTrack features improved details, custom-formulated nickel silver rail, DCC-friendly turnouts, specialty items such as wyes and bridge track, plus a full selection of accessories.

## WALTHERSTRACK™

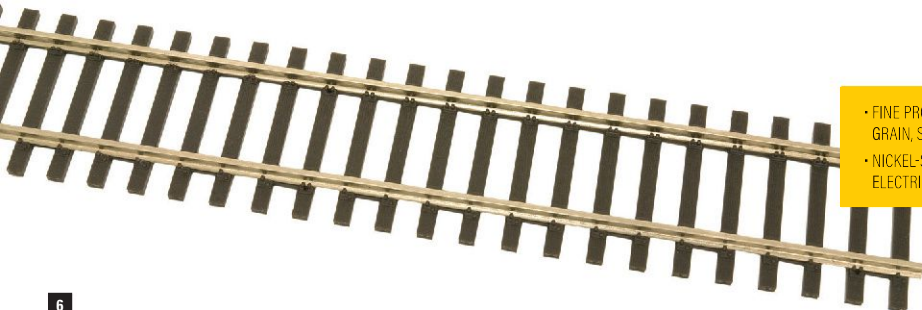

### CODE 83 AND CODE 100

Whether you prefer the low-profile realism of Code 83 or enjoy the high-rail look of Code 100, Waltherstrack has got you covered. Code 83 track is the top choice for modelers who want a more "in scale" appearance for their layout. Waltherstrack Code 83 components all look as good as they perform with fine-profile molded spike, wood grain, and tie plate details.

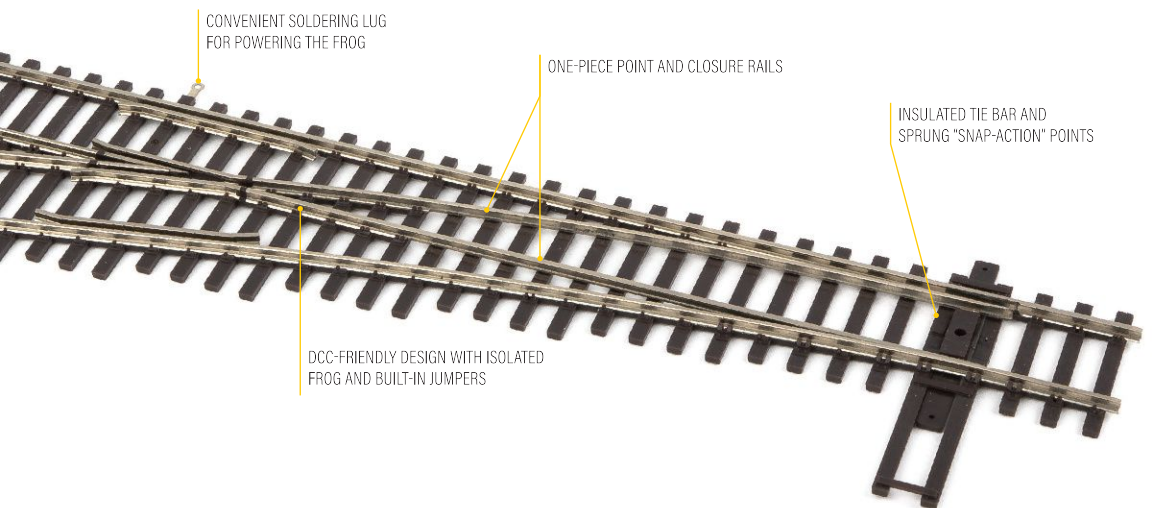

Waltherstrack Code 100 components have all the same great features of Waltherstrack Code 83 track. The higher rail profile makes Code 100 track the perfect choice for running older equipment with deeper wheel flanges. Code 100 is also an excellent choice for staging yards or other hidden areas where the extra reliability of larger rail is appreciated.

With flex track and a wide variety of turnouts in Code 83 and 100, Waltherstrack is the solution for a rock-solid HO scale right of way.

- FINE PROFILE TIES WITH WOOD GRAIN, SPIKE AND TIE PLATE DETAILS
- NICKEL-SILVER RAIL FOR SUPERIOR ELECTRICAL CONDUCTIVITY

## TROUBLE-FREE TURNOUTS

Developed with easy installation and trouble-free operation in mind, WaltherTrack turnouts feature custom-formulated nickel-silver rail, an insulated tie bar and one-piece point and closure rails, ensuring outstanding electrical conductivity. The turnout's DCC-friendly design includes an isolated frog with built-in jumpers. No extra wiring or modifications are necessary.

Snap-action points means that these turnouts are ready-to-use for manual operation right out of the box. With the flick of finger, you can set the route. The spring is also easily removable, making the turnouts completely compatible with Walther Controls and other switch machines.

Available in a wide variety of sizes, WaltherTrack Turnouts make it easy for you to design your dream layout. Download free track-planning templates and see all the Code 83 and Code 100 turnouts at [www.walthers.com/walthertrack](http://www.walthers.com/walthertrack)

## WALTHERSTRACK™

### SPECIALTY TRACK SOLUTIONS

Are you building a bridge across a raging river? Or perhaps you're just trying to squeeze in a yard ladder on a compact shelf layout. Whatever the situation, WaltherTrack offers a solution.

If you've invested the time in building that detailed trestle, truss, or plate girder bridge, don't skimp on the track. WaltherTrack bridge track offers the perfect finishing touch no matter what type of span. This H0 bridge track features closely spaced ties and double rail, just like the real thing.

Curved turnouts are great space savers on model railroads. They can help extend both yard leads and passing sidings. And because they share all the great features of other WaltherTrack turnouts, you can be sure that your H0 scale fleet will keep rolling smoothly.

Another convenient piece of specialty track is the double crossover. This component is essentially four turnouts in one track component. The WaltherTrack version simplifies the wiring and installation compared to building a crossover from scratch.

We're not done yet! We look forward to adding even more innovative track products in the future.

- SAME DCC-FRIENDLY DESIGN AS OTHER WALTHERSTRACK TURNOUTS
- GREAT SPACE-SAVER FOR LAYOUT
- AVAILABLE IN MULTIPLE RADII, RIGHT- AND LEFT-HAND VERSIONS

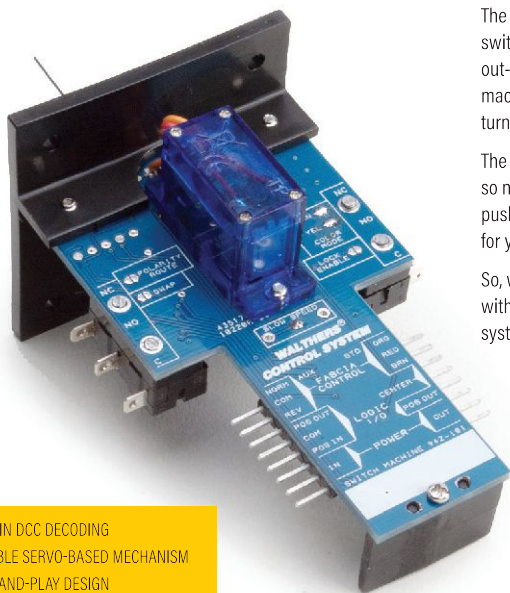

# WALTHERS CONTROLS™

## EASY REMOTE OPERATION

The Walthers Layout Control System brings you a low-cost solution for remote turnout control for all scales from Z to O. The heart of the system is a servo-based slow-motion switch machine that features integrated DCC decoding for out-of-the-box operation with a DCC throttle. Each switch machine also includes two built-in switches for powering turnout frogs, signals, and other accessories.

The system is easy to expand and uses plug-and-play wiring, so no soldering is required. Walthers also offers a variety of push buttons, lights and other components, making it easy for you to create your own custom control panels.

So, what are you waiting for? Go remote control in minutes with the Walthers Layout Control System. Check out all the system components at [walthers.com/waltthers-controls](http://walthers.com/waltthers-controls)

## A LEADER IN INNOVATION AND TECHNOLOGY IN THE MODEL RAILROADING INDUSTRY

Perhaps no other hobby manufacturer is so closely associated with track than Atlas. During the Depression years, teenaged Stephan Schaffan Jr. was given a pile of track parts and challenged to “come up with something better” by a local hobby shop owner. The “Switch Kit” that came from that encounter quickly turned into a best-seller, eventually leading to such items as the first practical rail joiner, preassembled turnouts and flexible track, making model railroading easier and more enjoyable. Still family-owned and operating from New Jersey, track remains a staple of today’s Atlas line, along with a growing selection of accessories, rolling stock, locomotives, structures and more in N, HO and O Scales. Here are just a few of the many Atlas track products available...

#### A Note on Availability

At Walther's, we strive to provide you with the widest variety of product possible. In order to achieve this goal, we maintain significant inventory on site. Despite our best efforts to have every item in house at all times, it is not realistically possible to do so. For your convenience, we do our best to promote items that are in stock and to clearly label other items—those that are new and available for Advance Reservations or items that are low in stock and have Limited Quantities Available when the Flyer goes to press. At times, we experience a quick sell out on a particular item or unexpected demand for an item that we believed to have sufficient stock in house. In many cases, items can be back ordered for future delivery. In other cases, we are unable to secure more of a particular item. For the most up to date availability information, we encourage you to check walther's.com, email us at [custserv@walther's.com](mailto:custserv@walther's.com) or call our Customer Service Team at 1-800-4-TRAINS.

Please know that we appreciate your support of both Walther's and your Local Hobby Shop. We are committed to making this Flyer a valuable part of your model railroading.

## SERVING MODELERS WORLDWIDE FOR OVER 75 YEARS

With a history of innovation and inspiration that stretches back some 75 years, Peco has grown from a tiny cottage industry founded by Sydney Pritchard in 1946 to a leading supplier of model railroad track and accessories. Produced entirely in-house at the company's headquarters in South Devon, England, the current Streamline selection includes over 20 different lines in popular gauges from Z to G that includes both standard and narrow gauges. Choose from a full selection of standard gauge, narrow gauges used by railways around the globe, and Code 70 and Code 83 built especially for North American modelers.

## MORE OPTIONS WITH NEW UNIFROG TURNOUTS

For even easier wiring and installation, Peco has recently begun upgrading select turnout with its innovative new Unifrog, which will eventually replace the traditional Insulfrog and Electrofrog. Combining the best features of the originals in one, Unifrog turnouts can be used right out of the package with unpowered frogs, or simply connect power to the factory-installed wiring at any time, with no need to remove or replace the turnout. Several sizes are now available and more are planned for future release.

**HO Railroad Car Float**  
Walthers Cornerstone®.  
Great addition to steam- or diesel-era harbor scenes, this detailed HO Car Float kit is typical of equipment used by many railroads to ferry cars to and from isolated areas. Waterline model has no hull, so it fits easily into new or existing scenery. Includes three plastic tracks for easy construction, and the finished model will look great with the Cornerstone Railroad Tug Boat (933-3153) and Car Float Apron (933-3068), both sold separately.
