## WELCOME TO OUR POWER EDITION

**Every railroad** - prototype or model - **needs the best locomotives** for every job!

Stand trackside, and you can't help but be swept up with the sound, motion and excitement as the engine approaches. Whether enjoying today's diesels at your favorite train-watching spot, or imagining how it used to be in the days of steam at a nearby museum, re-creating that thrill is easier than ever in miniature!

**Our March/April Flyer, focusing on power**, goes full-throttle to bring you a great line-up of locomotives in your favorite scales. For our lead unit, we're showcasing one of the oldest and best-known manufacturers of model locomotives with a special listing of Bachmann models. Part of our special lash-up also includes a Walther's Brand Spotlight look at some of the newest engines from both Walther'sProto® and Walther'sMainline®.

Release the brakes and notch up to page 24 for this month's exciting Bachmann feature, and page 4 for the Walther's Brand Spotlight.

**COVER STORY:** The last of the cooler night air fades with sunrise, promising another hot day over the whole of Illinois. Fortunately, this hard-working Burlington crew is reaching the end of their workday just ahead of the rising temperatures. The last car is coupled on, waybills are sorted, and once the brakes are pumped up, we'll be underway. Fresh off the EMD production lines at nearby LaGrange, the trip home will be a little slower than usual, giving the new GP9 a chance to break-in properly before it moves to its regular assignment. One of the most popular diesels model or prototype, many GP9s are still hard at work after a career that spans almost 70 years! The star of this month's cover shot is one of the latest High-Hood Walther'sProto GP9s, one of many new HO models in the Walther's Brand Spotlight that starts on page 4.

## THE RIGHT DIESEL POWER FOR ANY HO RAILROAD

Whether heading up fast passenger runs, shuffling cars through busy yards, drifting along quiet branch lines, or moving today's heavy tonnage that demands six-axle power, there's a Walther loco ready and waiting for your toughest assignments!

Pick the power that meets - and exceeds - your expectations with super-detailed WaltherProto replicas, and the affordable workhorses from WaltherMainline.

### ATTENTION TO EVERY DETAIL

Engineered for excellence, every Walthers model is a faithful replica, matching prototype design, dimensions and details! For modelers who want ultimate realism without the work, each WalthersProto engine comes fully assembled and packed with era- and road-specific details - many tooled especially for that release!

For hands-on operation at clubs, shows or home, WalthersMainline engines feature rugged detail that stands up to frequent handling. They're easily superdetailed at any time with Walthers own Diesel Detail kits and add-on parts from our many suppliers.

### PROVEN POWER AND PERFORMANCE

Under the hood of every WalthersProto and WalthersMainline model, you'll find a state-of-the-art drive with a five-pole, skew-wound can motor, flywheel and 14:1 helical-cut gears. A heavy die-cast metal chassis, all-wheel drive and electrical pick-up, LED lighting and more are all standard on every engine. Together, this rugged and reliable design delivers quiet, smooth performance at any speed whether running alone or MU'ed with other power.

### A SOUND INVESTMENT IN REALISTIC OPERATION

Whether you want your engines with "all the bells and whistles," prefer to install your favorite DCC decoders, or run standard DC, WalthersProto and WalthersMainline have you covered!

All DCC-equipped models come from the factory ready to enjoy with dual-mode decoders for DCC- or DC-powered layouts; WalthersProto replicas are equipped with ESU LokSound 5 decoders, while WalthersMainline models feature custom ESU decoders. # WALTHERS MAINLINE.

## TOUGH ON THE OUTSIDE, TOUGH ON THE INSIDE!

Whether you're running on a club layout, show display or at home, WaltherMainline engines are built to stand up to the toughest HO operating environments.

At the heart of every model is the same rugged, proven drive used in WaltherProto locomotives. This state-of-the-art system is built around a can motor, featuring a five-pole, skew wound armature that provides smooth starts and stops, and plenty of power. The drive train is equipped with 14:1 helical cut gears that reduce operating noise, and provide superior strength that translates into outstanding pulling power and longer operating life. All-wheel-drive and electrical pick up, along with a flywheel keep trains moving past dirty track and other potential power drops. A heavy die-cast metal frame that keeps the weight on those correct size RP-25 metal wheels, makes for impressive pulling power with long or short trains.

Durable details on the body shell stand-up to frequent handling with no danger of breaking off, and Walther's own Proto MAX™ metal knuckle couplers stand up under pressure when others won't.

### MORE THAN JUST A MODEL

Uncompromising attention to every detail takes every Walther'sProto engine to a new level of realism. Superb tooling, capturing the correct contours and lines of the prototypes, provides a solid starting point for the wealth of road- and era-specific details that set Walther'sProto models apart. Correct air horns, radio antennas, headlight styles and auxiliary lighting as appropriate, truck sideframes, handrails, pilots, dynamic or nondynamic brake and much more - many newly-tooled especially for each release - are factory-applied, or included as options with undecorated versions.

Along with great details on the outside, every Walther'sProto engine is available with factory-installed, fully-featured LokSound 5 Sound & DCC control. Accurate prime-mover sounds, multiple programmable choices for air horns and bells, plus sound effects including coupler clash and dynamic brakes, add a new dimension of fun to operations.

Beauty isn't just skin deep; under that beautifully detailed body you'll find the proven power of the Walther'sProto drive. Built for years of dependable service with unrivaled pulling power, a five-pole, skew-wound can motor, flywheel, 14:1 helical gears, all-wheel drive and electrical pick up deliver a full range of realistic speeds for any job.

\$46.00 Each

Refrigerated rail transportation revolutionized the produce industry in North America, allowing fresh commodities from the west to be sold for the first time in the east, and vice-versa.
