COVER STORY: The switch thrown, the rear brakeman gives the hand signal to shove back. Brakes release and the old EMD growls to life under a faint haze of exhaust. The slack runs in and wheels groan as they're coaxed into motion once more. With years of practice, the engineer deftly eases the short cut of empties back towards the elevator siding in the distance. Big on details, small in size, N Scale is an excellent choice for creating a realistic railroad, as shown in this compact scene by William Kowalski, part of his 2022 National Model Railroad Build-Off entry. Whether you have a limited space or plenty of room for a large layout, almost anything is possible in N Scale. With thousands of products available like the models shown here, N Scale is a perfect choice for your next project. Check out our special showcase page 4 for ideas to get started!

BIG DREAMS FOR SMALL SPACES AND BEYOND

Ever since the first standard gauge toy trains rolled into living rooms in the early 1900s, innovative manufacturers and modelers alike have risen to the challenge of building and running smaller replicas. Today's N Scale traces its start back to the 1960s when the new 9mm gauge, or N Scale as it came to be known (the word for "nine" begins with "n" in most languages), first captured the imagination of modelers worldwide.

BIG PLANS FOR YOUR NEXT LAYOUT?

N Scale is an ideal choice! At roughly half the size of HO, you can create everything from towering mountains to bustling cities in a size that dwarfs the trains - just as they do in the real world. And when it comes to operations, N Scale lets you run those long, long freights and passenger trains without compromise.

While many early models were toy-like, those days are long gone! Today's N Scale replicas have all the details and performance features of the bigger scales. Smooth, reliable drives, onboard DCC and sound, working lights, realistic couplers and add-on parts are standard on contemporary models. You'll also find a full selection of freight and passenger cars, structures, scenery materials and other accessories too!

Starting out or starting over, you'll find thousands of N Scale products and supplies available at Walthers to turn your dreams into a working railroad!

Model railroad scale comparison. These actual examples of model train locomotives show that each common scale is about half the size of the next larger scale. The locomotives shown here are in N (1:160) and HO (1:871).

N SCALE

EXCITING ADDITIONS TO WALTHERS N SCALE SELECTIONS

You can't spell "New" without N, and Walther's is working to bring you an exciting line-up of Cornerstone structure kits, SceneMaster products and Chooch accessories to bring your N Scale layout to life, with more on the way!

Whether inside the concrete canyons of a major city, or quiet farms in the open country, or street running past Main Street shops, the story of your railroad starts with structures. Cornerstone offers dozens of choices in N Scale, including many different types of heavy industries, railroad stations and servicing facilities, suburban homes, and rural buildings, that are all easily mixed and matched for your favorite area and era! Each is designed for easy construction, with parts molded in realistic colors, and include complete instructions.

D.

You'll also find a unique variety of accessories to speed construction from Chooch. These highly detailed resin castings include many common styles of wood, stone and concrete structures including bridge piers, tunnel portals and more, for super-realistic results along your right-of-way!

When it comes to the finishing touch of realism, you'll find dozens of items to unleash your creativity from SceneMaster! There's a full range of easy-to-use groundcover and scenery materials, along with unique accessories that add so much to any small scene.

A LEGACY OF QUALITY AND PRECISION

Kato Precision Models is a leading manufacturer of N and HO scale products worldwide, producing innovative models for over 50 years. Starting under the name of their parent company, Sekisui Kinzoku, their first N Scale release came in 1965 in the form of a Japanese C50 steam locomotive, which was one of the first N Scale steam models to feature a separate tender! Sekisui Kinzoku initially broke into the US market manufacturing many early models for Con-Cor, Atlas, and Stewart Hobbies in the 1960s and 70s. Then in 1986 when Kato had established modelers' expectations for quality, longevity and detail in N and HO Scale, Kato USA was born! Over the past 37 years, Kato has provided the pinnacle of N and HO scale for beginners and seasoned modelers alike.

TRACK THAT WORKS - WITHOUT THE WORK!

When it was first introduced to the Japanese model train market in 1957, UNITRACK was revolutionary because it provided the convenience of a snap track with none of the drawbacks - the patented UniJoiner clips hold rails tightly together but are easily disconnected, allowing modelers to reliably assemble and disassemble their track sections over and over and over again, without worrying about loosening joints, breaking clips, or lessening the electrical connectivity between track segments.

While much in the hobby has changed in the last 60+ years, Kato UNITRACK remains THE ideal track system for N and HO Scale modelers looking for reliability and ease of use; whether building fully detailed scenic layouts or temporary setups that can be operated around a Christmas tree or a dining room table!
